

Résumé

BRANKO RADIC

CURRENT EMPLOYMENT

January 1998 to Present

Research Associate, Associated Economic Consultants Ltd.

Branko Radic obtained his Master's Degree in Economics from the University of Medicine in Yugoslavia, specializing in health economics. His employment background includes sixteen years of economic research and analysis in the public and private sectors and four years of teaching at college and university levels. Mr. Radic has taught one university course in Canada and several college courses in Yugoslavia including political economy, financial mathematics, economics, public finance and statistics.

As a consulting economist, Branko Radic has gained substantial experience in the areas of econometric estimation and forecasting, and economic impact analysis. His background has also included survey design and analysis as well as work with census data. Additional experience includes collecting and defining health care data for the region of Sarajevo in Bosnia and Herzegovina.

Mr. Radic joined Associated Economic Consultants Ltd. in 1998. His areas of specialization are the applications of statistics and econometrics to large sets of data, and creating computer models for economic analysis.
